

CAPSTONE MIWG

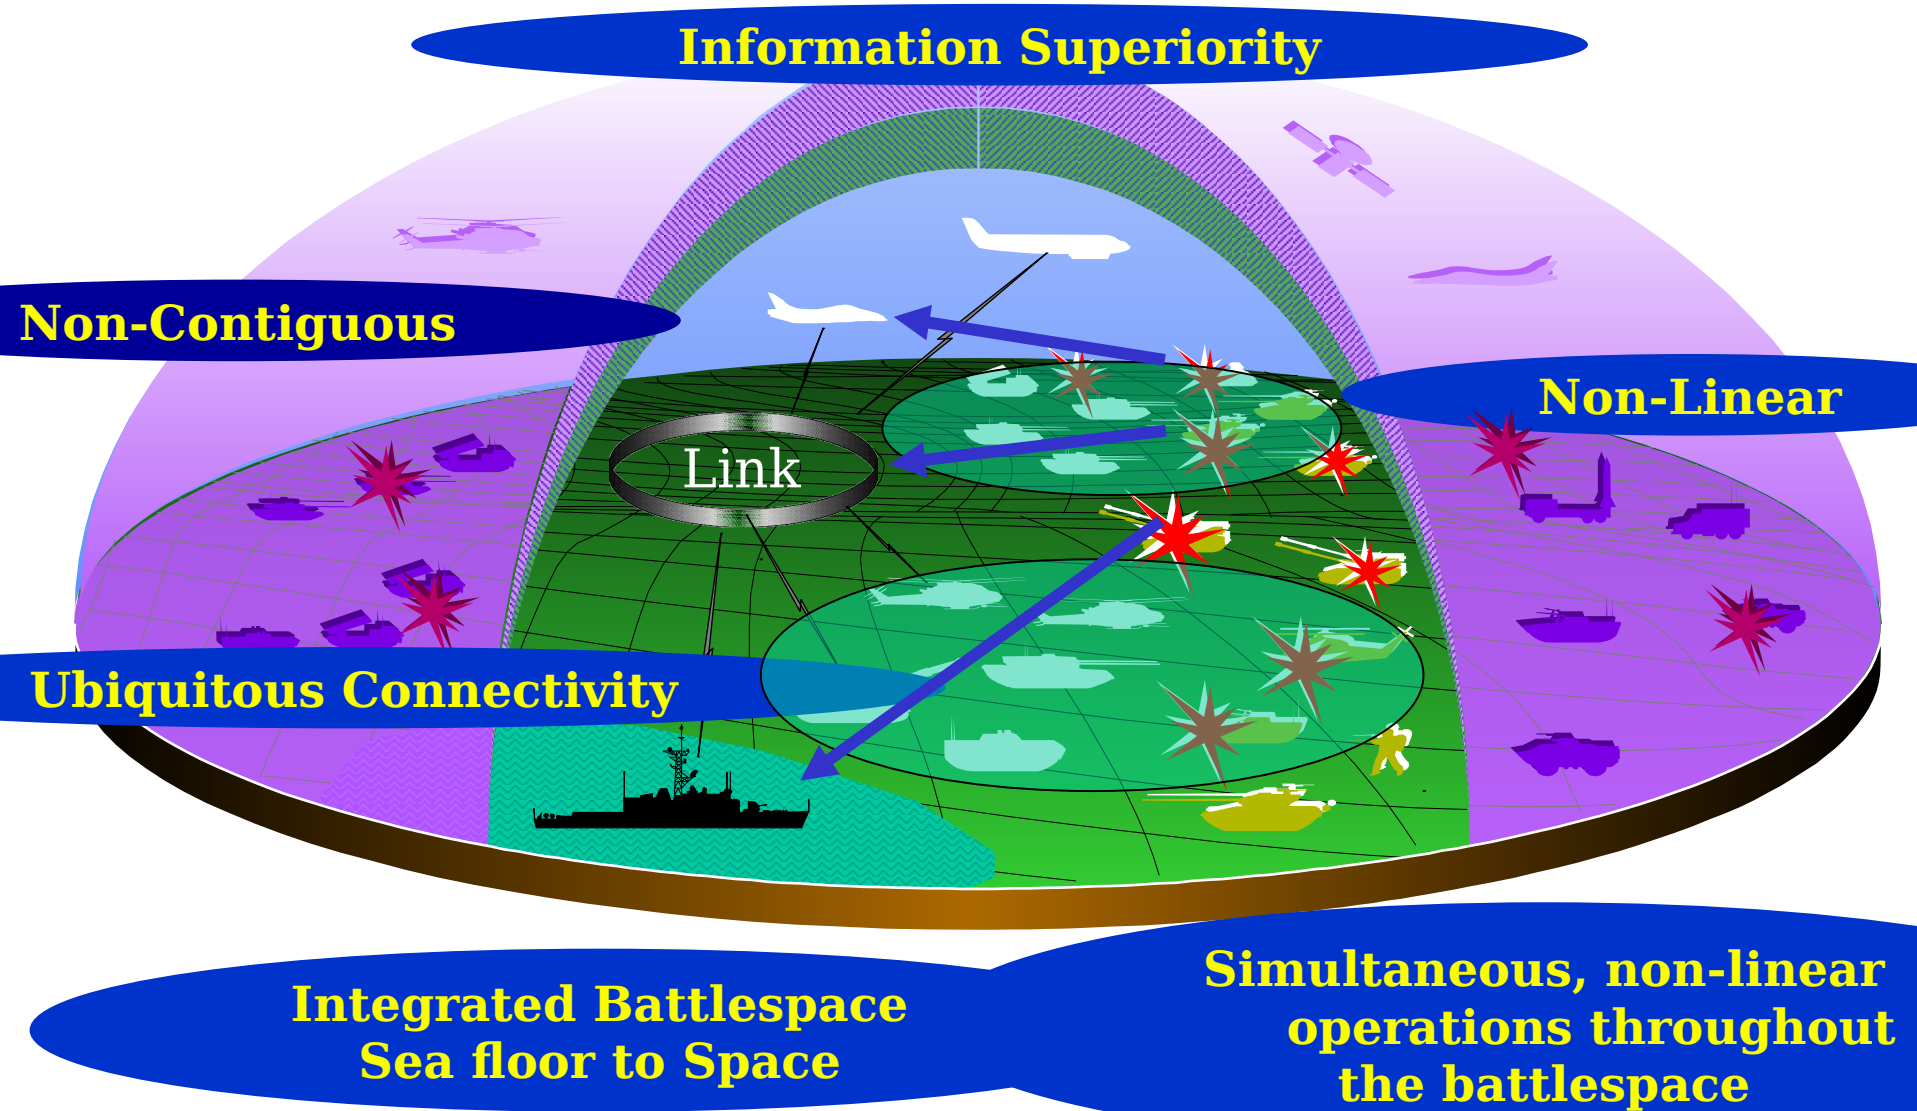

A Proposed “Way Ahead” for MIC Developmental Work

Current Situation

- **Original MIC mandate to improve info sharing in coalition environment**
- **Created coalition building guide, some progress being made on first version of GRIFFIN, CD&E group added to MIWGs**
- **Which way next?**
 - **continue with info sharing efforts?**
 - **focus on new areas (Eg, JPR)**
- **Decision will shape future work program**

Emerging Network Centric Warfare Paradigm

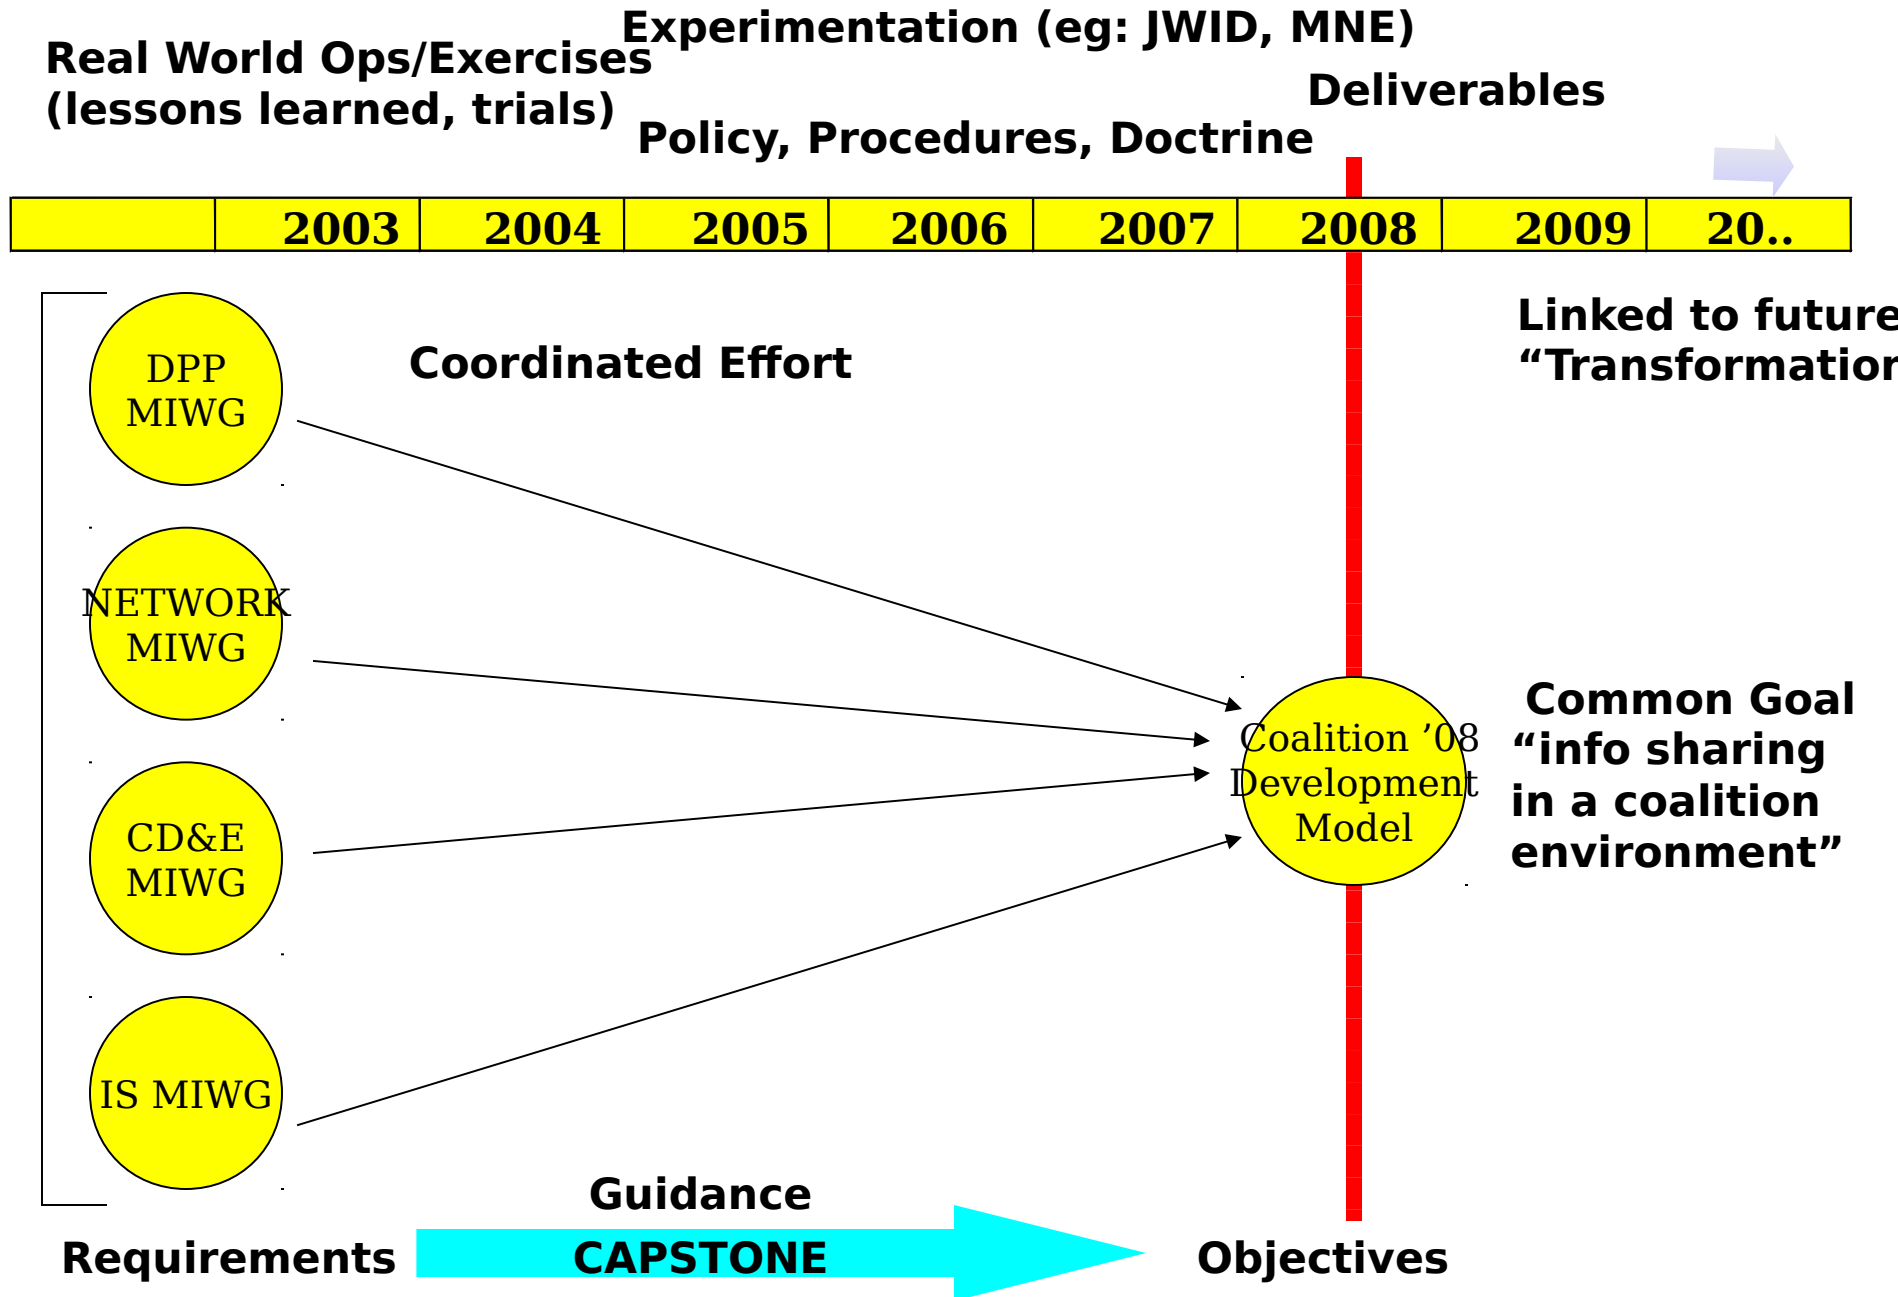

Proposal on Way Ahead

- **Place MIC “vision” in larger context of future force development**
- **Focus on info sharing in a coalition environment as the highest level of interoperability**
- **Develop a long-term view (approx 5 years) of a future coalition info exchange environment**
- **From the future model, extract key interoperability requirements for developmental effort by member nations**

Related Points

- Need to capitalize on previous MIC efforts, consolidate and then advance “with a plan”**
- Establish a leadership role wrt other interoperability fora (may even be able to rationalize some of these)**
- Build synergy between MIWGs**
- More logical connection between CD&E effort, force development (eg JWID), and operational activity (including linkages to exercises)**

Interoperability Development - Timeline Depiction

Recommendations

- **Discuss proposed way ahead, raise with other MIWGs**
- **Raise at upcoming MIC meeting**
- **If approved, develop 2008 model and extract requirements**
- **Build a work plan**
